Last Updated: March 21, 2026

Gal is a developer platform that helps you manage AI agent configurations across your team. These Terms govern your use of the Gal website, CLI, API, GitHub App, and related services (the "Services") provided by Scheduler Systems Ltd.

By using Gal, you agree to these Terms. If you don't agree, please don't use the Services.

Gal provides tools for developers including:

- A CLI tool (gal) for syncing agent configurations
- A web dashboard for managing projects and settings
- A REST API for programmatic access
- GitHub App integration for repository workflows
- IDE extensions for VS Code and other editors

The Services are under active development. Features may change, and we will notify you of any material changes that affect your use of the Services.

You need an account to use most features. You're responsible for keeping your credentials secure and for all activity under your account. Treat API keys like passwords—never commit them to public repositories or share them publicly.

You must be at least 16 years old to use Gal. If you're using Gal on behalf of an organization, you confirm you have authority to bind that organization to these Terms.

Use Gal for lawful software development. You may not:

- Violate any laws or third-party rights
- Attempt to hack, disrupt, or abuse our infrastructure
- Scrape, crawl, or bulk-export data from the Services
- Use outputs to train competing AI models or services
- Circumvent rate limits or access restrictions
- Transmit malware or malicious code
- Impersonate others or misrepresent your identity

Some features use AI to generate or enhance content. AI outputs can be **imperfect, incomplete, or unexpected**. You are responsible for reviewing and validating all AI-generated content before use.

Do not rely on AI outputs for:

- Medical, legal, or financial decisions
- Safety-critical systems (aviation, emergency services, etc.)
- Any application where errors could cause harm

We do not guarantee the accuracy, reliability, or appropriateness of AI-generated content.

You retain ownership of the code and content you submit to Gal ("Your Content"). By using the Services, you grant us a limited license to process Your Content as needed to provide the Services.

We do not:

- Claim ownership of your code
- Use Your Content to train AI models without your explicit consent
- Share Your Content with third parties except as needed to operate the Services

If you provide feedback or suggestions, you grant us permission to use them to improve the Services.

When you install the Gal GitHub App, you grant us access only to repositories you explicitly authorize. We access only the data necessary to provide the functionality you've enabled. You're responsible for ensuring you have authority to install the App on those repositories.

Gal is available under the following plans:

Free — \$0, up to 5 developers. Includes core features: discovery, approved config, and CLI sync.

Convenience — \$10 per developer per month, unlimited developers. Includes proposals and priority support.

Enforcement — \$25 per developer per month. Everything in Convenience plus policy enforcement and audit logging.

Enterprise — Custom pricing. Everything in Enforcement plus SSO, custom integrations, and dedicated support.

Paid plans are billed per developer seat. Seats are adjusted automatically when team members are added or removed.

We may change pricing with at least 30 days' written notice. Price changes do not affect the current billing period.

Promotional Pricing

We may offer promotional pricing, complimentary access, or discounts at our discretion. Promotional access is non-transferable and applies only to the organization to which it was granted. We reserve the right to modify or discontinue promotional pricing at any time if we detect fraud, abuse, or a violation of these Terms.

Promotional access continues until we notify you otherwise. We will provide at least 30 days' written notice before transitioning your account from promotional pricing to standard paid billing. You will not be charged without your explicit consent and advance notice of the applicable rate.

Billing

Paid subscriptions are billed on a recurring basis (monthly, or as specified in your plan). By subscribing to a paid plan, you authorize us to charge the applicable fees to your payment method on a recurring basis. Paid subscriptions renew automatically at the end of each billing period.

You will not be charged without clear advance notice of the amount and billing date. All prices are stated in U.S. dollars and exclude applicable taxes, which will be itemized separately.

Design Partner Program

Organizations participating in our Design Partner Program receive complimentary access to the Services as specified in their program invitation. Design Partner terms include:

Complimentary access to the Services for the duration of the program.

No payment method is required during the program period.

If we decide to transition your account to standard pricing, we will provide at least 30 days' written notice, including the applicable rate and billing date.

Design partners may discontinue use of the Services at any time.

Participation in the Design Partner Program does not create an employment, agency, or partnership relationship between you and Scheduler Systems.

Cancellation

You may cancel your subscription at any time by using the cancellation option in your account settings, or by contacting us at legal@scheduler-systems.com.

Upon cancellation, your access to paid features continues until the end of the current billing period. No further charges will be applied after cancellation takes effect. If you are on promotional or complimentary access, cancellation means you will not be transitioned to paid billing. Your account and data will remain accessible on the Free plan unless you choose to delete your account.

We will confirm your cancellation in writing via email. Cancellation does not entitle you to a refund of fees already paid for the current billing period.

You can stop using Gal anytime and delete your account through your settings or by contacting us. We may suspend or terminate your access if you violate these Terms or engage in behavior that harms the platform or other users.

The Services are provided "as is" without warranties of any kind. We don't guarantee uninterrupted access, error-free operation, or that the Services will meet your specific needs. Use at your own risk.

To the maximum extent permitted by law, Scheduler Systems Ltd. is not liable for any indirect, incidental, or consequential damages arising from your use of the Services. Our total liability is limited to the greater of: (a) amounts you paid us in the 12 months before the claim, or (b) \$100 USD.

These Terms are governed by the laws of Israel. Disputes will be resolved in the courts of Tel Aviv-Jaffa. If any provision is unenforceable, the rest remain in effect. We may update these Terms—continued use after changes means you accept them.
