Terms of Service - Gal Developer Platform

Gal Terms of Service

Last Updated: January 24, 2026

Gal is a developer platform that helps you manage AI agent configurations across your team. These Terms govern your use of the Gal website, CLI, API, GitHub App, and related services (the "Services") provided by Scheduler Systems Ltd.

By using Gal, you agree to these Terms. If you don't agree, please don't use the Services.

1. The Services

Gal provides tools for developers including:

- A CLI tool (`gal`) for syncing agent configurations
- A web dashboard for managing projects and settings
- A REST API for programmatic access
- GitHub App integration for repository workflows
- IDE extensions for VS Code and other editors

The Services are currently in **early access**. Features may change, and we may introduce paid plans in the future with clear pricing before any charges apply.

2. Your Account

You need an account to use most features. You're responsible for keeping your credentials secure and for all activity under your account. Treat API keys like passwords—never commit them to public repositories or share them publicly.

You must be at least 16 years old to use Gal. If you're using Gal on behalf of an organization, you confirm you have authority to bind that organization to these Terms.

3. Acceptable Use

Use Gal for lawful software development. You may not:

- Violate any laws or third-party rights
- Attempt to hack, disrupt, or abuse our infrastructure
- Scrape, crawl, or bulk-export data from the Services
- Use outputs to train competing AI models or services

- Circumvent rate limits or access restrictions
- Transmit malware or malicious code
- Impersonate others or misrepresent your identity

4. AI-Generated Content

Some features use AI to generate or enhance content. AI outputs can be **imperfect, incomplete, or unexpected**. You are responsible for reviewing and validating all AI-generated content before use.

Do not rely on AI outputs for:

- Medical, legal, or financial decisions
- Safety-critical systems (aviation, emergency services, etc.)
- Any application where errors could cause harm

We do not guarantee the accuracy, reliability, or appropriateness of AI-generated content.

5. Your Content & IP

You retain ownership of the code and content you submit to Gal ("Your Content"). By using the Services, you grant us a limited license to process Your Content as needed to provide the Services.

We do not:

- Claim ownership of your code
- Use Your Content to train AI models without your explicit consent
- Share Your Content with third parties except as needed to operate the Services

If you provide feedback or suggestions, you grant us permission to use them to improve the Services.

6. GitHub App

When you install the Gal GitHub App, you grant us access only to repositories you explicitly authorize. We access only the data necessary to provide the functionality you've enabled. You're responsible for ensuring you have authority to install the App on those repositories.

7. Payment

Gal is currently free during early access. If we introduce paid features, we'll notify you in advance with clear pricing. You won't be charged without agreeing to a paid plan.

8. Termination

You can stop using Gal anytime and delete your account through your settings or by contacting us. We may suspend or terminate your access if you violate these Terms or engage in behavior that harms the platform or other users.

9. Disclaimers

The Services are provided "as is" without warranties of any kind. We don't guarantee uninterrupted access, error-free operation, or that the Services will meet your specific needs. Use at your own risk.

10. Limitation of Liability

To the maximum extent permitted by law, Scheduler Systems Ltd. is not liable for any indirect, incidental, or consequential damages arising from your use of the Services. Our total liability is limited to the greater of: (a) amounts you paid us in the 12 months before the claim, or (b) $100 USD.

11. General

These Terms are governed by the laws of Israel. Disputes will be resolved in the courts of Tel Aviv-Jaffa. If any provision is unenforceable, the rest remain in effect. We may update these Terms—continued use after changes means you accept them.

Software License

The GAL CLI (gal) is distributed under the Elastic License 2.0 (ELv2). You may use, copy, modify, and distribute the CLI for any lawful purpose, including internal commercial use. You may not offer the CLI (or a substantial portion of it) to third parties as a hosted or managed service. The GAL backend — including the API, policy engine, organization sync, and audit infrastructure — is proprietary software owned by Scheduler Systems Ltd. No license is granted to the backend source code. The full text of the Elastic License 2.0 is available at elastic.co/licensing/elastic-license and in the CLI repository.
